(54) Title: A SYSTEM AND METHOD FOR MANAGING RESOURCES AND RIGHTS

(57) Abstract: A system for managing resources and/or rights comprising: a set of entities, each entity of the set having an asso-
ciation with at least one other entity of the set; and a set of resources and/or rights possessed or controlled by each entity. A first
entity of the set of entities determines the subset of resources and/or rights owned by the first entity that another entity may use,
exercise or view details of, as appropriate, based on the minimum number of associations that exist between the first entity and the
other entity. Other entities that otherwise meet the minimum number of associations may also be excluded from using, exercising or
viewing details of the set of resources and/or rights by the first entity if recorded on an exclusion list.
